OnSite Testing App (iOS) Bluetooth Quick User Guide

OnSite Testing alcohol & drug solutions

Pairing Instructions

Step 1

Access the iPad/iPhone Settings > Bluetooth menu. Ensure BT is on.

Step 4

Scroll up to and select the 'Pairing' option. Devices will start to populate the screen.

DO NOT select a device from this screen. It will be done from the App.

Access the LE5 Breathalyser Setup Menu: press the $\Lambda \& V$ buttons together on the idle screen for 4 seconds until a code entry screen appears. Enter code 00005000.

Step 5

Open the App, navigate to Settings > Pairing > Scan

The App will search for the LE5 serial number. When it is displayed, select "Pair". The iPad/iPhone will request the pairing pin. Enter the pin displayed on the LE5. Select Pair. The LE5 will display "Paired".

Navigate to the Bluetooth Comms menu > Enable BT if not already. Scroll down to and select 'Serial' option.

Ensure the 'Auto Send Standard' and 'Auto Send Passive' options are set to 'All' if that option is required.

Step 6

Navigate to the App Dashboard by selecting the 'Back' option. Select '**Quick Test Mode**' and begin testing.

For '**Full Test Mode**', go to 'Settings', select the LE5 device, set expiry date and begin testing.

Troubleshooting Quick Guide

Result Failed to Send? Possible cause for error:

- Paired to incorrect tablet/phone
 Lost connection Requires repairing
- Devices are not paired
- Error Message (e.g. stale bonding)

Follow the below steps to re-establish a fresh connection between devices.

Step 1

On the iPad/iPhone, select Settings > Bluetooth. Select the (i) icon next to the LE5 serial number and select 'Forget This Device'.

3:32 ...I २ ■> < Bluetooth Alcolizer-24007723 Forget This Device

Step 2

On the LE5, follow step 2 above to enter the 'Setup' menu. Select BT Comms menu > Serial > Forget This Device. The message "No device paired" will display.

Step 3

Follow steps 1 - 6 of the **Pairing Instructions** (see left hand side) to re-establish a connection between devices.
