Pairing Instructions

Step 1

Access the iPad/iPhone Settings > Bluetooth menu. Ensure BT is on.

Step 2

Access the Druglizer Main Menu: press the Λ & V buttons together on the idle screen and navigate to Configuration > AlcoCONNECT > Configure

Step 3

Press the V button, ensure BT is enabled if not already. Press the V button again until page 5 is displayed. The screen will start to populate with devices.

Step 4

DO NOT select a device from this screen. It will be done from the App.

Step 5

Open the App, navigate to Settings > Pairing > Scan

The App will search for the Druglizer serial number. When it is displayed, select "Pair". The iPad/iPhone will request the pairing pin. Enter the pin displayed on the Druglizer. Select Pair. The Druglizer will display "Paired".

Step 6

For '**Full Test Mode**', go to 'Settings', select the Druglizer device, set expiry date and begin testing.

Quick Test Mode is currently not supported in Druglizer.
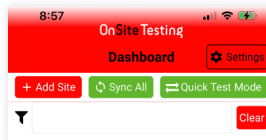

Troubleshooting Quick Guide

Result Failed to Send? Possible cause for error:

▸ **Paired to incorrect tablet/phone**   ▸ **Devices are not paired**
▸ **Lost connection - requires repairing**   ▸ **Error Message (e.g. stale bonding)**

**Follow the below steps to re-establish a fresh connection between devices.**

Step 1

On the iPad/iPhone, select Settings > Bluetooth. Select the ⓘ icon next to the Druglizer serial number and select 'Forget This Device'.
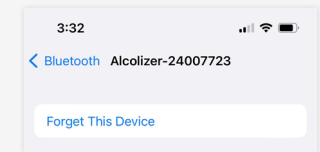

Step 2

Access the Druglizer Main Menu: press the Λ & V buttons together on the idle screen and navigate to Configuration > AlcoCONNECT > Forget. Select Forget. The Druglizer and Android phone/tablet are now unpaired.
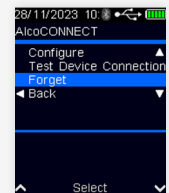

Step 3

Follow steps 1 – 6 of the **Pairing Instructions** (see left hand side) to re-establish a connection between devices.

OnSite Testing App (iOS)
Testing Session Quick Guide

**Alcolizer LE5
Druglizer**

Testing Instructions

Step 1

Select the appropriate 'Site' from the dashboard, listed in white boxes with the Site name.
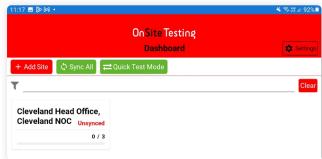

Step 2

Select 'Add Test' on the top left. Complete all donor information. All fields are required.

Step 3

Tap the Donor Signature section to select test type and donor medication if any. Donor must sign the Agreement.
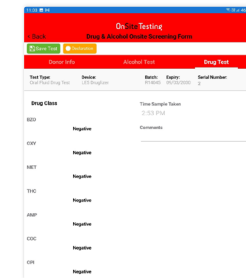

Step 4

Select Drug Test once donor information has been completed.

Complete the drug screening using the LE5 Druglizer.

Step 5

The result will transfer to the app and populate the results screen.
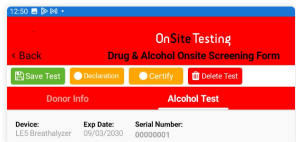

Step 6

The donor must sign the Declaration form.

The Certification form will then pop up for the Collector to sign.

Step 7

The app will now display the Site section again and the test listed as completed in green.

Follow the above steps if completing more than one test.

Step 8

Once the testing session is complete, sign the Summary form. Both signatures are required. After signing, select 'back' on the top left of the form.

Step 9

Select 'Sync' on the top of the screen. Ensure you have internet connection.

Access the AlcoCONNECT platform to view results and reports.
