Druglizer LE5 Oral Fluid

Drug Tester

Digital Analyser Provides Clear Results – No Interpretation Required

Certified to AS/NZS 4760:2019 Druglizer provides unmatched accuracy & reliability for Oral Fluid Testing.
Combines cutting-edge technology with a user-friendly design to deliver fast, accurate, and reliable drug screening results in as little as 60 seconds.

Why Choose Druglizer?

Digital Display - No Manual Interpretation
By electronically displaying results, removing the ambiguity of traditional line-based indicators.

Sophisticated Testing
Advanced linear detector array and optical filtering system deliver accurate and fast drug screening results with digital record.

Multi Drug Group Screening
Observed testing detects a variety of drug groups, configured to target concentrations as specified under AS/NZS 4760:2019.

Easy Data Download
Use AlcoCONNECT™ Toolbox software to easily download, filter, analyse, and export Druglizer Test data in CSV format to assist your workplace compliance.

- Electronic results display from 60 seconds
- Bluetooth printing, app connectivity and GPS
